**Publications Cremer- Lab in Biocomputing of Nuclear Genome Structure**

J. Odenheimer, D. Heermann, G. Kreth (2009) Brownian dynamics simulations reveal regulatory properties of higher-order chromatin structures. *Eur. Biophys. J.* **38**: 749 - 756.

W. Friedland, H. G. Paretzke, F. Ballerini, A. Ottolenghi, G. Kreth, C. Cremer (2008) First Steps towards systems radiation biology studies concerned with DNA and chromosome structure within living cells. *Radiat. Environ. Biophys.* **47**: 49 – 61.

L. Brianna Caddle, J.L. Grant, J. Szatkiewicz, J. von Hase, B.J. Shirley, J. Bewersdorf, C. Cremer, A. Arneodo, A. Khalil, K.D. Mills (2007) Chromosome neighborhood composition determines translocation outcomes after exposure to high-dose radiation in primary cells. *Chromosome Res.* **15**: 1061 – 1073.

G. Kreth, S.K. Pazhanisamy, M. Hausmann, C. Cremer (2007) Cell type-specific quantitative predictions of radiation-induced chromosome aberrations: A computer model approach. *Radiat. Res.* **167**: 515 – 525.

G. Kreth and C. Cremer (2007) Chromatin Structure and the Formation of Chromosomal Alterations in Chromosomal Alterations: Methods, Results and Importance in Human Health, Ed. Günter Obe, Springer Verlag Heidelberg.

L. S. Shopland, C. R. Lynch, K. A. Peterson, K. Thornton, N. Kepper, J. von Hase, S. Stein, S. Vincent, K. R. Molloy, G. Kreth, C. Cremer, C. J. Bult, T. P. O'Brien (2006) Folding and organization of a contiguous chromosome region according to the gene distribution pattern in primary genomic sequence. *J. Cell Biology* **174**: 27–38.

G. Kreth, C. Cremer (2005) "Biocomputing": strahlenbiologische Risikovorhersage. *Ruperto Carola, Forschungsmagazin der Universität Heidelberg*, 2/2005.

G. Kreth, J. Finsterle, J. von Hase, M. Cremer, C. Cremer (2004) Radial Arrangement of Chromosome Territories in Human Cell Nuclei: A Computer Model Approach Based on Gene Density Indicates a Probabilistic Global Positioning Code, *Biophysical Journal* **86**: 2803 –2812.

W. G. Müller, D. Rieder, G. Kreth, C. Cremer, Z. Trajanoski, J. G. McNally (2004) Generic Features of Tertiary Chromatin Structure as Detected in Natural Chromosomes. *Molecular and Cellular Biology* **24**: 9359–9370.

G. Kreth, J. Finsterle, C. Cremer (2004) Virtual radiation biophysics: implications of nuclear structure. *Cytogenet. Genome Res* **104**:157 –161.

G. Kreth, P. Edelmann, Ch. Münkkel, J. Langowski, C. Cremer (2002) Translocation frequencies for X and Y chromosomes predicted by computer simulations of nuclear structure, *Some Aspects of Chromosome Structure and Functions* (Edits. R.C. Sobti, G. Obe, R.S. Athwal) pp. 57 – 71. Narosa Publ. House, New Delhi.

G. Kreth, P. Edelmann, C. Cremer (2001): Towards a dynamical approach for the simulation of large scale, cancer correlated chromatin structures. *It. J. Anat. Embryol.* **106**: 21 – 30.

G. Kreth, Ch. Münkkel, J. Langowski, T. Cremer, C. Cremer (1998) Chromatin structure and chromatin aberrations: Modelling of damage induced by isotropic and localized irradiation. *Mutat. Research* **404**: 77-88.

C. Cremer, H. Bornfleth, J. Bradl, A. Esa, G. Kreth, B. Rinke, R. Eils, C. Münkkel, S. Dietzel, M. Granzow, A. Jauch, X.-Y. Guan, P. S. Meltzer, J. M. Trent, L. Trakhtenbrot, D. Zink, J. Langowski, M. Hausmann, T. Cremer (1997) Nuclear architecture and the formation of chromosome aberrations. *Radiat. Res.* **148**: 513-515.
